

March 24, 1977

Mr. A. W. Kessler
Westinghouse Electric Corporation
P.O. Box 88578
Tukwila, Washington 98188

Dear Mr. Kessler:

As you are aware, Seattle City Light will be testing your capacitor containing Isopropyl Biphenyl-CG. Isopropyl Biphenyl-CG is a possible replacement for PCB's. One of our concerns is effect of this substitute on the environment. Please send any information that you have in this regard.

Sincerely,

(Sgd.) Pete Henault
